

ASSOCIATE DIRECTOR, ACTUARY

Job Field: Reinsurance

Location: Asia

About Howden Re

Introducing Howden Re, combining Howden Re's global distribution network and data driven reinsurance expertise with TigerRisk's leading position in Treaty reinsurance, capital markets, capital advisory, technology and analytics offering. Howden Re is uniquely positioned to be the premier reinsurance broker and advisor for the global market.

About the role

We are seeking an actuary looking for a new challenge and advancing to the next level. You will have the opportunity to work on projects in a variety of fields and markets with an elite team of brokers and analysts in a growing, client-facing team in a head-office location. **We welcome applications from candidates across Asia for this position. Consideration will be given based on the qualifications and skills of the applicants.**

Howden Re's unique entrepreneurial spirit fosters a culture of innovation which we strongly believe will be key to successfully addressing and solving the current and future challenges met by industry. The International Actuarial Analytics team work as one team, which will give you a unique opportunity to benefit from other colleagues' insights and experience and thus accelerate your professional development.

Day to day you will have the opportunity to bring your expertise to assist clients in making decisions about capital, reinsurance and pricing. You will also work in close collaboration with brokers at different stages of the transaction process to deliver best-in-class and tangible results to our clients. As such, we expect you to have regular contacts with brokers, clients and reinsurers and building your network, whether internally or externally, will be encouraged.

You will contribute to differentiate Howden Re in the marketplace by delivering superior service to existing clients and to shape our Analytical offering to help win new business. This includes the following key tasks:

- Design, price, and assess reinsurance structures using actuarial techniques, internal tools and models.
- Analyse client data to assist brokers in structuring and evaluating impact of various reinsurance programs.
- Interpret catastrophe modelling outputs and advise clients on catastrophe risk
- Support the delivery of actuarial and financial modelling services to external clients

We already have a good share of regional and global multi-national accounts that, along with local business in regional markets, make for the opportunity to work on varied actuarial projects and lines of business.

Required qualifications

- Ideally 4-5 years of relevant background in the (re-) insurance industry
- Profound understanding of actuarial methods, accounting principles, capital and risk management and regulatory environment
- Excellent analytical and communication skills
- Team player attitude with an entrepreneurial mindset
- Proficient IT skills including data visualization tools such as Power BI
- Bachelor's or master's degree in actuarial science or a related field (mathematics or finance)
- Actuarial certification by a globally recognized actuarial association, or actively pursuing such actuarial qualification

Please apply in confidence with full resume to the Human Resources Department via email to APACHR@howdengroup.com
