# AASB 17: what does it mean for public sector insurers?

Khar Mun Tang & Somya Ohri

© Khar Mun Tang & Somya Ohri

This presentation has been prepared for the Actuaries Institute 2023 Injury and Disability Schemes Seminar.

The Institute Council wishes it to be understood that opinions put forward herein are not necessarily those of the Institute and the Council is not responsible for those opinions.

# Agenda

1.Applicability	04
2.Timeline	09
3.Implementation Approach	11
4.Examples	19
5.Questions	21

# Applicability

## **Applicability: IS IT CAKE?**

Step 1: Does it look like cake?

1

Is it judged that both pre-requisites are established?

Is the arrangement enforceable?

#### **AND**

Does the arrangement have an identifiable coverage period?

The arrangement is OUTSIDE the scope of the Standard

Proceed to the next step

The arrangement is OUTSIDE the scope of the Standard

Coverage period considerations

Agreed documentation

Premium or levy cycles

Adjunct to another insurance contract

Open ended arrangement based on eligibility criteria

Pay-as-you-go type funding

# **Applicability: IS IT CAKE?**

Step 2: Does it cut like cake?

To what extent are the two indicators, considered on a collective basis, judged to be met?

The arrangement's funding is sourced from those who stand to benefit from coverage

The arrangement involves accepting risks and benefits the same as, or similar to, those offered by private sector insurers

The arrangement is
LIKELY TO BE
OUTSIDE the scope
of the Standard

TO A SIGNIFICANT EXTENT

The arrangement is
LIKELY TO BE
WITHIN the scope
of the Standard

**NOT DEFINITIVE** 

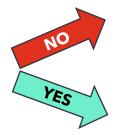

Proceed to the next step

# **Applicability: IS IT CAKE?**

Step 3: Does it taste like cake?

If Step  $\hat{2}$  is not definitive, does a collective assessment of the two other considerations lead to a judgment that the arrangement gives rise to insurance contracts?

Does the entity have objectives, policies and processes for managing risks associated with the arrangement and have its financial performance assessed against those objectives and how successfully it applies those policies and processes?

The arrangement is **OUTSIDE** the scope of the Standard

**AND** 

Does the entity have a separate fund, or earmarked assets, restricted to being used to meet benefits associated with the arrangement?

The arrangement is **WITHIN** the scope of the Standard

The arrangement is **OUTSIDE** the scope of the Standard

## **Captives**

Applicability of AASB 17 to captives

- Paragraph 6A of AASB 17 public sector standard: "When a government department administers the activities of a captive insurer, the government department may elect to apply either AASB 17 Insurance Contracts or AASB 137 Provisions, Contingent Liabilities and Contingent Assets in determining the information to be disclosed about the administered captive insurer activities."
- Paragraph BC273 of the same standard discusses a "free choice for government departments to apply either standard to prepare administered item information on captive insurers that do not prepare standalone general purpose financial statements."

#### Key issues to assess in relation to captives...

Are you a captive?

Are you a captive?

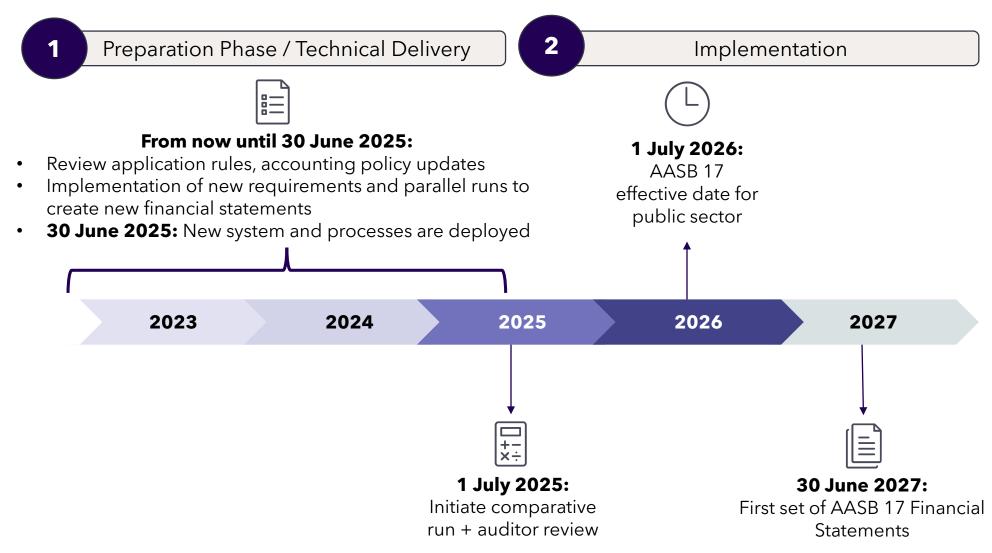

Oo you have standalone general purpose financial statements?

What standard does the consolidated entreport under?

# Timeline

## **Timeline**

### Part 2 Measurement approach

What are the two different measurement approaches?

Premium Allocation Approach General Measurement Model

What does this mean for me?

Measurement and presentation is done separately for insurance and reinsurance contracts.

Substantially the same approach as is currently used for unearned premiums and outstanding claims

#### What are some of the key differences under the AASB 17 compared to existing standards?

- Outstanding Claims Liabilities / Liability of Incurred Claims
- Liability for Remaining
  Coverage / Unearned Premium
- 3 Discount rates

What will it be under AASB 17?

Discounted central estimate with risk adjustment

Unearned premium based on **premium** received or best estimates of future cash flows with a risk adjustment

Discount rate with illiquidity premium

What was the standard originally?

**AASB 1023:** Discounted central estimate with risk margin **AASB 137:** Discounted best estimate

**AASB 1023:** Unearned premium based on premium written **AASB 137:** Premium is earned as it is received

AASB 1023 and AASB 137: Risk Free Rates

## **Part 3 Risk Adjustment**

What is a risk adjustment under AASB 17?

The compensation an entity requires for bearing the uncertainty about the amount and timing of the cash flows that arises from non-financial risk as it fulfils insurance contracts

And...what is the description of risk margin under AASB 1023?

A risk margin relates to the inherent uncertainty in the central estimate of the present value of the expected future payments

Other risk adjustment considerations?

Are you pricing for profit?

So, what are the main differences between these two definitions?

AASB 1023 includes financial & non-financial risk

AASB 17 only looks at compensation for uncertainty arising from
non-financial risk

Notion of compensation is explicit under AASB 17 Under AASB 1023, the risks are regarded as being inherent in the cash flows.

What is the level of variability of your cashflows?

Does it represent the compensation for risk appropriately?

#### **Part 4 Onerous Contracts**

AASB 17 has a much greater emphasis on identifying onerous contracts and their identification has fundamental impacts on a wide range of accounting outcomes.

The public sector has been relieved from segregated the portfolio into different groups based on their onerousness.

The onerous contracts assessment for public sector can be done at the scheme level, aligned to the level of aggregation discussed earlier

Which group will most public sector schemes land in?

Most public sector schemes will most likely be onerous at initial recognition. Pricing strategy and scheme performance targets need to be considered

What typically needs to occur with onerous contracts?

• **NEW:** A loss component will need to be determined:

What will change / be different from AASB 1023?

- A premium liability valuation will need to be carried out
- This is similar to the current LAT test, but granularity of the test could differ

• Losses are recognized up-front that would otherwise have been recognized over the coverage period

#### **Part 5 Expenses**

How is cost allocation changing under AASB 17?

The allocation of expenses incurred is more complex under AASB 17 as **costs need to be** reviewed for nature and has to be appropriately allocated to the different categories by the pre-determined unit of account.

What are the types of expenses that will be measured?

**Insurance acquisition cash flows** *Includes insurance contract cashflows* 

Other insurance costs
Includes claims handling, admin,
associated taxes, levies

Out of scope costs
Includes product development
and training costs

Key questions for you to start thinking about after determining cost allocation definitions

When is the 1st budget cycle where we use cost allocation?

How is this going to be included in the cash flows? Which system is going to perform that (e.g. actuarial, SL, data systems)?

## Part 6 Presentation of key disclosures (1/2)

#### Balance Sheet

Largely unchanged, except for a few highlighted elements below

Assets	Liabilities
Cash and cash equivalents	Derivatives
Derivatives	Liabilities associated with assets held for sale
	Financial liabilities at FC through PL
Financial assets at FV through PL	Investment contracts
Loans and receivables	Borrowings
	Other financial liabilities
Investment property	Insurance contracts liabilities
Investments in associates	Insurance component
Insurance contracts assets	Investment component
Insurance component	Reinsurance contracts liabilities
Investment component	Insurance component
Reinsurance contracts assets	Investment component
Insurance component	Employee benefit liabilities
Investment component	Current income tax liabilities
Property and equipment	Deferred income tax liabilities
Intangible assets	Provisions
Current income tax assets	Other liabilities
Deferred income tax assets	Total liabilities
Other assets	Share capital
	Total Equity
	Total liabilities and equity

Chart of Accounts need to be remapped / recreated to allow for AASB 17 accounts

#### What has changed from AASB 1023 to AASB 17?

AASB 1023 Account	AASB 17 Account
Net outstanding claims	
Net unearned premiums	Reinsurance contract assets
Insurance payables	dosets
Recoveries Receivables	Insurance contract liabilities
Deferred acquisition costs	

## Part 6 Presentation of key disclosures (2/2)

#### Statement of comprehensive income

New representation seen below

	20XX	20XX
Insurance revenue	X	Χ
Insurance service expenses	(X)	(X)
Net reinsurance income / (expense)	X	Χ
Insurance service result	X	X
Net insurance finance income / (expense)	X	Χ
Net reinsurance finance income / (expense)	X	Χ
Investment income	X	Χ
Investment management expense	(X)	(X)
Net investment result	X	Χ
Profit or loss	Х	X
Gains and losses on financial assets at FVOCI		Χ
Total comprehensive income	Х	Х

/IDSS 2023

#### **Key callouts:**

- Revenue and expense are recognized as services delivered and incurred respectively. Investment components are excluded.
- Insurance finance expenses need to be
   reported separately under AASB 17

Chart of Accounts need to be remapped / recreated to allow for AASB 17 accounts

## **──** What has changed from AASB 1023 to AASB 17?

	AASB 1023 Account	AASB 17 Account
1	Gross written premium	
	Unearned premium adjustment	
	Gross earned premium	Insurance revenue
	Hindsight adjustments	
	Net earned premiums (a)	

	AASB 1023 Account	AASB 17 Account
	Gross claims expense	Insurance service expenses
	Unexpired risk liability	
	Net claims expense (b)	
	Underwriting and other expenses (c)	

AASB 1023 Account	AASB 17 Account
Recoveries	Net reinsurance income / (expense)
Not Applicable	Net insurance finance income (expense) Net reinsurance finance income (expense)

## Framework

#### **Example - Workers Compensation Insurer**

Scope determination **Workers Comp** 

Is it enforceable and does it have an identifiable coverage period? To what extent are the two indicators, considered on a collective basis, judged to be met?

The arrangement's funding is sourced from those who stand to benefit from coverage

The arrangement involves accepting risks and benefits the same as, or similar to, those offered by private sector insurers

The arrangement is LIKELY TO BE WITHIN the scope of the Standard

**AASB 17 must** be implemented by 1 JULY 2026!

#### An example of a framework to ASSESS, PREPARE, REALISE and then TEST & RUN the AASB 17 solution

(b) Preparation

(6 months)

#### **Activities will include:**

- Accounting policy development
- Solution design
- Data gap assessment (e.g., policy, premiums and claims data)

(a) Assessment (2 months)

#### Design & building the solution which will involve:

- Performing AASB 17 calculations
- Designing & building solution

(c) Realisation (6 months)

(d) Test and Run

(3-12 months)

- Data Harmonisation
- Data Storage

#### **Activities will include:**

- Testing and integration
- Parallel run (reconciliation guidance & transition disclosures)
- Review & submit financial statements

#### **Activities will include:**

YES

Thank you

**IDSS 2023** 

12 – 14 November Hobart
